

CIRRUS TRANSITION TRAINING

Transition training is the first step to enjoying the Cirrus Life - whether you purchase a new or pre-owned Cirrus aircraft. Transition Training is designed exclusively for licensed pilots transitioning into a new, used or different model of Cirrus aircraft.

This course focuses on mastering aircraft control, engine management, avionics procedures and abnormal situations in VFR conditions. The Course satisfies most insurance requirements and is typically completed in 3 days of training with our Factory Authorized Instructors.

CIRRUS TRANSITION TRAINING PACKAGE

\$2,400*

INCLUDES: Up to 3 days of intensive flight and ground training with a Destinations Aviation Certified Flight Instructor

DOES NOT INCLUDE:

- **Aircraft rental.** You may train in your own aircraft or rent one of our Cirrus aircraft for an additional cost.
- **Fuel cost.** If you train in our aircraft, fuel is not included.
- **Travel cost.** If training is conducted anywhere other than a Destinations Aviation Center, additional travel expenses apply.

* Pricing is based on average number of hours a typical student takes to complete the course. Your times may vary. Additional hours may be required for you to complete our training course at an additional cost.
